Variables and Constants—Guided Notes

Name ______ Period_____

		Varial	ble—			
	-Factors in an experiment					
-Likely to change, or vary.						
	Control—	Indepe	endent—	Depende	ent—	
-The test group that you		-The variable to scientist		-The variable that may		
do not add the		changes, or adds to the		change because of what		
ind	ependent variable to.	experiment		the scientist ch	nanges.	
-Th	e " normal " group.	-The variabl	e heing	-The variable b	eing	
		tested.	c being	measured.)	
	Constants—	-The "I-cont	t rol" variable.			
-something the scientist makes						
sure is the same throughout the entire experiment.						
entire experiment.						
-Every experiment contains						
multipl	e constants.					
Practice: Identify the different variables in the following hypotheses.						
, , , , , , , , , , , , , , , , , , ,						
	If you increase the amount of milk you drink, then you will increase the strength of your bones.					
Independent variable:			_			
	Dependent variable:					
•						
2. If you increase the number of hours you spend in practice, then you will increase the number of free					r of free throw	
	shots you will make.					
Independent variable:				_		
	ререпиеті variable:					
3.	3. The higher the temperature of the water, the faster an egg will cook.					
	•					
Independent variable:						
Dependent variable.						
4.	The more sun the plant receives, the taller the plant will grow.					
	•	•	-			
Independent variable:
