

Step 2: Form a Hypothesis

Hypothesis: an educated guess or prediction; an "if, then" statement

If _____ independent variable _____
then _____ dependent variable _____

Example:

Independent Variable:
I feed my cat a lot of food

Dependent Variable
she will get fat

If _____
then _____

★ Remember ★

Try to use INCREASE and DECREASE
in your hypothesis!

Ex. IF I increase the amount of food I give
my cat, THEN she will increase her weight

Now Try it on Your Own!

'Writing a Good Hypothesis'
Just 'plug and chug' in your variables!
